

ELVASTON CASTLE AND COUNTRY PARK

PLANNING APPLICATION CD9/0222/34 NOW PUBLISHED

We need YOUR HELP to object to the new ROAD & CAR PARKS – Here’s Why:

The planning application includes:

- a new **500** space car park with 300 space overspill
- a new access road to the country park from the B5010 (Shardlow Road)
- widening of the B5010 (Shardlow Road) and removal of historic and protected trees in greenbelt
- a new four spur roundabout over 26m in diameter on the B5010 (Shardlow Road)
- infrastructure plans to be funded by Derbyshire tax payers through council funding

The impact on existing visitors, Elvaston Castle Country Park and the local community:

Destruction of woodland including Rookery Wood	Less green space
Wildlife habitats lost	Significantly increased pollution
Increased noise levels	Loss of greenbelt
Potential for more construction development	Loss of the rural village identity
Villages at increased risk of flooding	In contravention of climate change policy
Excessive concrete & infrastructure	Historic and protected trees felled
Raised parking fees leading to increased congestion in the villages of Thulston and Elvaston	

If you have concerns about the planning application, have your say:

View the full planning details on the Derbyshire County Council planning website and leave your comments directly www.planning.derbyshire.gov.uk planning reference CD9/0222/34

Elvaston Parish Council and local residents opposed to the application have produced a template objection letter to send to your MP/ Local District Councillor which is available at <https://www.elvaston-pc.org.uk/>

Support the local community crowd funding towards a legal objection to the planning application <https://www.crowdfunder.co.uk/stop-elvaston-castle-environmental-destruction>

STOP ELVASTON CASTLE & COUNTRY PARK ENVIRONMENTAL DESTRUCTION

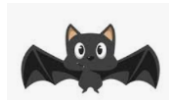

PLEASE ACT NOW TO PREVENT:

- The felling of protected veteran trees and removal of historic woodland
- The destruction of protected wildlife habitat and loss of biodiversity
- An additional new roundabout on the B5010 Shardlow Road
- The construction of a dual direction access road across pastoral farmland which will bisect the country park
- A dramatic increase in vehicular traffic in and around the country park
- Two huge new car parks (500 cars plus 300 overspill), both adjacent to the Local Nature Reserve
- The destruction of precious greenbelt and arable farmland
- Higher CO2 emissions and resultant climate change
- Loss of open green space proven to enhance physical and mental well-being
